techniques of Coaching. 61 hours of
specific training to be a coach as part of
the Professional Coach Certificate Program
ACSTH approved by the International Coach
Federation..

Active Results LLC
Certificación el 08 de Abril 2019

SUMMARY

Hi there! I'm Niko, a Software Developer working remotely from Chile.

I like to create content and I'm sharing about the technologies that I currently use, experiences and daily life while developing, through my blog and creating community.

I work at Stefanini Latam how Senior Full Stack Developer in a big project of Digital Transformation, raising MVPs and taking them to production for real clients throughout Chile and Latin America.

I have more than 12 years experience working in the digital world.

I currently work with: JavaScript, TypeScript, React, Nextjs, Tailwindcss, E2E, Integration and Unit Testing, Jest, React, Testing Library, Cypress, Express / Nest.js, Java Spring Boot, GraphQL / API Rest, MongoDB, Microservices, Github Actions, Docker, Kubernetes y AWS.

I love creating new products with friendly user interfaces, with modern architectures, developing with the latest technologies and working in a team.

My favorite stack is: Nextjs + Express + GraphQL + Neo4j + Vercel.

I'm restless about learning more and I like facing new challenges.

I'm not afraid of the new.

I'm nerd. I like video games, series, reading books and comics and talking a lot.

EXPERIENCE

Stefanini Latam, October 2020

Digital Transformation Project, raising MVPs and taking them to production for real clients throughout Chile and Latin America. Development of the main app, development of microservices, modernization of the legacy, administration of libraries, among other things.

Agencia Digital Socialweb, October 2013 / October 2014

Web Developer: frontend website development. Website optimization strategies design.

ABOUT ME

I really like reading books, getting lost on the internet, studying, talking, listening to podcasts, politics, teaching other people, participating in learning, going out to eat, I love beer, pizza, hamburgers, watching movies, series and anime, play video games, travel and enjoy life with my wife and family.

I am not just a computer nerd and I spend time into code. I have also wanted to train in other skills, such as coaching, to be able to unleash the full potential that I have in myself and also to be able to contribute to others in my daily relationships. This has allowed me to acquire new tools to work as a team. It was also a beautiful learning process that together with my wife we have been able to go through.

ACKNOWLEDGMENTS

Graduated with Distinction from the Universidad Santo Tomás in 2014.

Design contest finalist Ideas Jóvenes Con-Suma Responsabilidad in 2013.

During the period of 2011/2012 I was Vice President of the UST Student Federation at the national level.

In 2011 I was invited and became part of the First School of Leaders of the Universidad Santo Tomás at the national level.

COMPETENCES

Leadership, teamwork, good command of communication and expression skills, focus on innovation, mentoring, coaching, rapid and autonomous learning, self-management, active listening, empathy, solutionist mindset, responsibility, vocation for technology, among other competences in which I have been specializing.

I HOPE

Work 100% remote.

Working with modern technologies in a company that has a focus on people as well as customers.

I want to develop innovative products and take advantage of both the potential and what has been learned.

I want to continue learning and continue cultivating my career.

Be part of a team that in its values, there is no discrimination, and that promotes diversity and gender equality.

I want to make software that is user-friendly in its experience and interface.

I want my work to be a good experience, stimulating, energetic, collaborative, challenging and meaningful to me.

WHY ME?

I like to do my work with excellence.

Because teamwork is essential for me.

I always focus on positive feedback.

I love promoting collective learning.

Because I can be a Padawan as well as a Jedi Master.

I love taking on new challenges.

I have a lot of motivation.

I never want to stop learning.

I am a good partner and also a good leader.

I've been preparing for a long time.

I am responsible with my work.

Let's leave the rest for you to know me.
